

Green strategy

We believe that it is our duty to ensure we leave behind a better, more sustainable environment for future generations.

Our Green Strategy shows we are committed to embracing sustainability through educational activities and implementing specific measures to meet environmental legislation and reduce carbon footprint to ultimately protect our planet's natural resources.

We aim to be the most eco-friendly trust with our aims:

- **Excellence in education and skills for a changing world:** Preparing all young people for a world impacted by climate change, through learning and practical experience, to ensure they have the skills to be able to make informed decisions regarding future life choices
- **Energy and water:** Reduce consumption of energy and water with careful management, using green technologies where possible, thus reducing carbon emissions
- **Procurement:** To positively influence the sustainability performance of suppliers and the sustainability credentials of the goods and services we procure
- **Estates:** All substantial works to school buildings consider environmental sustainability improvements to reduce consumption of energy and make buildings more efficient
- **ICT:** All substantial changes to academy ICT systems will consider environmental sustainability improvements to reduce consumption of energy and provide more efficient communication systems to reduce unnecessary travel
